DETAILED ACTION

1. Claims 1 to 26 are presented for examination.

Allowable Subject Matter

2. The indicated allowability of claims 1 to 8 is withdrawn in view of the 101 rejection.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 to 8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 1 recites " a method for performing a table look-up operation on a first table having N entries said first table having a first data field of table index values and a second data field of computed table values and said table index values of said first data field being separated by one or more intervals, said method comprising....."

The language of the claim raises a question as to whether the claim is directed merely to an abstract idea that is not tied to a technology art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 25 U.S.C. 101.

Art Unit: 2133

Allowable Subject Matter

4. Claims 9 to 26 are allowed.
